Subject: Newfields report

Mike, we got the report from Scott Stout at Newfields late last week. We are reviewing the results with our Corporate people today, and with the USS folks (Tin Mill). You shall have the report tomorrow.

In regards to scheduling the meeting, we believed it very important to have Mr. Hanning and Mr. Sullivan from USS at the meeting, and the earliest we could get both our Corporate folks and the USS folks up there is the 12th of July.

Subject: report

Mr. Barnett-

I have not received the report that you explained that you would deliver to the federal agencies. It is becoming increasingly more difficult to believe that Arcelor Mittal is taking this ongoing oil release seriously since no notable progress has been made, and you've already explained that you would have been able to deliver the report before last week as you originally planned having it before the meeting you wanted to hold last week. I do not see a reason that EPA and USCG does not have this report in our hands, and why the meeting you'd like to present was postponed four weeks.
